

GET HAY SEASON READY!

AIR-TECH

Wireless Controlled ULV Applicator

Save money, time & water!

Air-Tech Wireless Controlled ULV Applicator provides accurate application of silage and hay inoculants using air blast technology to deliver rates as low as 50mL per tonne.

Available in 10L Dual, 50L & 100L Tank Sizes

**Air-Tech® is a registered trademark of Grevillia Ag*

SI-LAC®

HAY FORTE

First Choice for High Moisture Hay

SI-LAC Hay Forte is a new generation, vacuum packed bacterial hay preservative containing *Lactobacillus plantarum*, *Enterococcus faecium* and *Lactobacillus buchneri*.

Robust and reliable, Si-Lac Hay Forte gives hay makers "peace of mind" by enabling baling up to 25% total moisture. Bale ahead of the rain, or go early to achieve higher quality.

Available in 450g sachets to treat 50 tonne.

**Si-Lac® is a registered trademark of Grevillia Ag*

SI-LAC®

extra

Silage & Hay Inoculant

Tried and trusted in both Silage & Hay

When you need a reliable and fast acting inoculant for your silage or hay, your first choice for reducing the likelihood of mould and creating a stable temperature is Si-Lac® Extra.

Available in sachets to treat 50T & 250T

**Si-Lac® is a registered trademark of Grevillia Ag*
